PROFESSIONAL SUMMARY

Innovative Web Developer with strong expertise in building responsive, user-centric web applications utilizing React.js and WordPress. Proficient in UI/UX design principles, no-code development, and leveraging Generative AI tools to streamline workflows and elevate visual design. Detail-oriented problem solver with a proven ability to adapt to dynamic environments and deliver high-quality, client-ready projects.

SKILLS

- **Frontend:** HTML, CSS, JavaScript, React.js
- **Web Development:** WordPress, Elementor, Responsive Design
- **Design:** UI Design, UX Principles, No-Code Development
- **AI & Productivity:** Generative AI Tools, Prompt Engineering
- **Professional Skills:** Communication, Teamwork, Problem Solving, Adaptability, Time Management

INTERNSHIP EXPERIENCE

Web Development Intern

Jul 2025 – Aug 2025

Open Weaver | Chennai

- Engineered responsive websites utilizing advanced no-code and low-code development platforms.
- Leveraged Generative AI tools to accelerate web design workflows, optimize UI/UX layouts, and create custom branding assets including logos.
- Gained practical, hands-on experience in visual design and the successful end-to-end delivery of client-ready projects.

Python With Django Intern

Jan 2023 – Feb 2023

Nitroware Technologies | Coimbatore

- Assisted in the backend development and architecture of web applications utilizing the Python Django framework.
- Implemented and integrated interactive front-end components writing clean code in HTML, CSS, and JavaScript.
- Demonstrated a strong problem-solving mindset and adaptability while collaborating on technical development tasks.

Web Development Intern

Dec 2021 – Jan 2022

Accent Techno Soft | Coimbatore

- Designed, developed, and deployed functional web applications using core technologies including HTML, CSS, and JavaScript.
- Participated actively in real-world project lifecycles to enhance the structural design and capabilities of web platforms.
- Collaborated effectively in a team environment to translate concepts into live, accessible websites.

PROJECTS

Movie Station

Technologies: React.js, JavaScript, HTML, CSS, REST APIs

- Developed a highly responsive movie web application leveraging React.js to ensure seamless cross-device compatibility.
- Engineered advanced search functionality and category filtering to streamline the user journey and improve data navigation.
- Integrated third-party APIs to dynamically fetch and display data, significantly enhancing overall content accessibility.
- Designed an intuitive, dynamic user interface (UI) focusing on modern design principles to elevate the end-user experience.

BookDot

Technologies: WordPress, Elementor, Astra Theme, Local Hosting

- Built a comprehensive, responsive bookstore platform utilizing the WordPress CMS, Elementor page builder, and Astra themes.
- Customized website layouts, pages, and plugins to align with specific visual design and functional requirements.
- Configured and managed local hosting environments to securely test, customize, and optimize website performance.
- Applied responsive design principles to guarantee seamless navigation across desktop, tablet, and mobile viewing platforms.
